Summary:

Dedicated Frontend Developer experienced in building and optimizing user interfaces using React and Tailwind enhanced UI performance and maintainability by integrating API's and implementing reusable React components. Proven track record in Agile methodologies, excelling in collaboration, code reviews, and debugging sessions. I aim to leverage my team expertise to contribute to high quality project deliveries in a dynamic developer environment.

Work Experience

Chingu

November 2024 – Present

Frontend Developer Tier 2

- Built the user interface for an in-house corporate cafe menu generator, fostering team collaboration and learning AI prompt engineering, which led to ranking #1 in team communication for 3 weeks.
- Merged with more advanced Git version control techniques, increased pull requests to 50+ per week, reviewed and critiqued peer code, ran – 2-3 hour pair programming sessions, debugging and resolving any merge conflicts.
- Optimized reusable React components, integrated API's such as Spoonacular and Gemini, improving UI performance and maintainability. Developed skills and moved into using more Tailwind CSS for faster and more proficient product delivery.
- Followed Agile methodology to deliver 95% of MVP's by the start of the 5th week in a 6 week project cycle and used Trello and GitHub Projects backlogs to track 25+ tasks, enabling the team to achieve 95% on schedule completion rate per sprint.

StackTack (Owner)

July 2023 – Present

App Designer / Developer

- Cut the need to login into 6+ apps (Wi-Fi, electric, banking, credit, etc.) down to 1 app. Eliminated any need to use an overcrowded Google calendar by utilizing specificity centering around bills and finance.
- Tracked investments and credit card balances, which helped increase my own credit score by 28 points+ points by simplifying the weekly tracking of due dates.
- Secured financial privacy by implementing Firebase Authentication systems, enhancing data protection and user security.

Tech Tacks

- **Primary:** React.js, JavaScript, HTML, CSS, Tailwind CSS
- **Secondary:** Python, Flask, SQL, SQLite, Node.js, CRUD/HTTP Methods
- **Design:** Flow Charts, Wire Frames, Use Case Diagrams, Color Pallets
- **Tools:** PostMan, MySQL Workbench, Figma, Canva, Trello(Backlog) Agile, Scrum, Git
- **Soft Skills:** Customer service, hospitality, sales & marketing, public speaking, event planning/organization, hosting, problem solving, attention to detail, client farming/hunting work

Team Projects

AiQ

May 2025 – April 2025

- AI Prompt generator with Gemini API integrated in for the user to test responses

PlatePal

Jan 2025 – Feb 2025

- Weekly Menu generator for in-house corporate cafes to create and accommodate allergies and food preferences.

Solar Plexus

Nov 2024 – Dec 2024

- Scheduling and tracking app for solar panel installment across Los Angeles area

Education

Bottega University

Aug 2019 – May 2023

- CS and Development
